Specification of Competency Standards
for the Automotive
Unit of Competency

Functional Area - Vehicle Servicing

Title	Arrange vehicle examination
Code	111736L3
Range	This unit of competency is applicable in vehicle servicing workshops. Practitioners should be able to check and repair vehicles on customers' demand and ensure that the condition of vehicles can meet the statutory requirements of relevant road traffic regulations. They should also be able to deliver the respective vehicles to the vehicle examination department for examination upon completion of work to obtain documents such as a certificate of roadworthiness.
Level	3
Credit	3 *(For Reference Only)*
Competency	**Performance Requirements** 1. Knowledge (Arrangement of vehicle examination) • Master the structure of vehicle systems and the associated service and inspection techniques. • Understand relevant local regulations on road traffic and vehicle safety. • Understand the procedure for the arrangement of vehicle examination. 2. Performance (Arrange vehicle examination) • Inspect vehicle defects according to relevant local regulations and customer requirements on road traffic and vehicle safety. • Estimate the cost entailed for the repair items according to inspection results. • Carry out or arrange repairing procedure. • Test various vehicle systems upon completion of rectification work, including using instruments and equipment to test vehicles, so as to determine if they can meet the statutory requirements of relevant road traffic regulations. • Bring and prepare vehicle documents for the vehicle owners and make appointments and arrangements for inspection according to vehicle types. • Conduct further rectification for the parts that failed to pass the examination and arrange for a second examination. • Obtain documents such as the certificate of roadworthiness, etc. after passing vehicle inspection and deliver them to the vehicle owners.
Assessment Criteria	The integrated outcome requirements of this unit of competency are that the practitioner being assessed shall prove that he/she is: • Capable of identifying vehicle defects according to relevant local regulations and customer requirements on road traffic and vehicle examination; • Capable of carrying out or arranging rectification work according to inspection results; • Capable of accurately inspecting various vehicle systems to ascertain that they can meet the statutory requirements of relevant road traffic regulations; and • Capable of preparing vehicle documents for vehicle owners and making appointments and arrangements for examination according to vehicle types.

Remark	The credits value of this unit of competency is set on the presumption that the practitioner concerned has already possessed good knowledge of vehicle system servicing and occupational safety and health requirements. (This UoC replaced 108716L3)
