

Specification of Competency Standards
for the Fashion
Unit of Competency.

Functional Area - Quality System & Sustainability

Title	Review sustainability reports
Code	111629L5
Range	Review sustainability reports to identify opportunities for improving sustainability performance and risks of a business. This applies to individuals who are required to review sustainability reports so that the negative sustainability impact of a business can be progressively improved and eliminated.
Level	5
Credit	4 (<i>For Reference Only</i>)
Competency	Performance Requirements 1. Knowledge in the subject area Be able to: • understand the purposes and procedures for reviewing sustainability performance • recognise the common review and assurance standards for sustainability reports • outline the range of life cycle impacts of products and the various sustainability impacts along the value chain • apply sustainability reports as a diagnostic tool to help improve and eliminate sustainability impacts • recognise common deficiencies in sustainability reports (e.g. data inconsistency, incomplete disclosure, unclear targets, and lack of comparability) 2. Application and process Be able to • monitor key trends, achievements and risk profiles from different sustainability reports • compare results with performance thresholds (e.g. energy efficiency, hazardous chemical discharge) to identify any significant differences and inadequacies • collaborate with stakeholders (e.g. academics, consultants) in reviewing sustainability reports when required • review and monitor sustainability performance and risks to identify any competency gaps and training issues to be addressed • provide evidence-based advice for sustainability improvement decision-making 3. Exhibit professionalism Be able to • systematically review and analyse information to evaluate performance and identify areas for improvement • ensure internal operations and external relationships are compatible with the latest expectations for sustainable products
Assessment Criteria	The integrated outcome requirements of this UoC are the abilities to accomplish: • Systematic examination of sustainability reports and identification of opportunities for improving sustainability performance and risks to progressively improve and eliminate negative sustainability impacts of a business.
