Specification of Competency Standards for the Logistics Industry <u>Unit of Competency</u>

2. Code 3. Range 3. Range 4. LOCUCT204A This unit of competency is applicable to logistics service providers. Practitioners should be capable of loading and unloading cargo according to relevant regulations, standards, codes, and workplace procedures (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) 4. Level 5. Credit 6. Competency 6. I Relevant knowledge of load and unload cargo • Understand load characteristics • Understand the job requirements and workplace procedures • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Load and unload cargo • Identify load characteristics and take into consideration when determine loading and unloading procedures • Identify and handle hazardous substances/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) • Pack/unpack load to make effective and safe use of spaces • Load cargo/goods with reference to relevant workplace procedures and regulatory requirements • Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures • Conduct unloading activities in an efficient and safe manner • Identify goods requiring special documentation and handling and follow appropriate procedures 6.2.2 Secure and protect cargo • Ensure load distribution comply with workplace and legislative requirements • Segregate hazardous substances/dangerous goods • Use load protection and restraint equipments to secure load • Protect load according to workplace and legal safety requirements • Capable of identifying load characteristics • Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements • Capable of identifying load characteristics • Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements • Capable of identifying load characteristics • Capable of identifying hazardous/dangerous goods with relevant permit/re	1. Title	Load and unload cargoes
This unit of competency is applicable to logistics service providers. Practitioners should be capable of loading and unloading cargo according to relevant regulations, standards, codes, and workplace procedures (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) 3. (for reference only) 6. Competency 6. Relevant knowledge of load and unload cargo • Understand load characteristics • Understand the job requirements and workplace procedures • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Load and unload cargo • Identify load characteristics and take into consideration when determine loading and unloading procedures • Identify and handle hazardous substances/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) • Pack/unpack load to make effective and safe use of spaces • Load cargo/goods with reference to relevant workplace procedures and regulatory requirements • Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures • Conduct unloading activities in an efficient and safe manner • Identify goods requiring special documentation and handling and follow appropriate procedures • Conduct unloading activities in an efficient and safe manner • Identify goods requiring special documentation and handling and follow appropriate procedures • Segregate hazardous substances/dangerous goods • Use load protection and restraint equipments to secure load • Protect load according to workplace and legal safety requirements • Segregate hazardous substances/dangerous goods • Use load protection and restraint equipments to secure load • Protect load according to workplace and legal safety requirements • Complete required documentation • Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements • Capable of identifying hazardous/dangerous goods		
3 (for reference only) Performance Requirements: 6.1 Relevant knowledge of load and unload cargo Understand load characteristics Understand the job requirements and workplace procedures Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Load and unload cargo Identify load characteristics and take into consideration when determine loading and unloading procedures Identify and handle hazardous substances/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) Pack/unpack load to make effective and safe use of spaces Load cargo/goods with reference to relevant workplace procedures and regulatory requirements Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures Conduct unloading activities in an efficient and safe manner Identify goods requiring special documentation and handling and follow appropriate procedures Ensure load distribution comply with workplace and legislative requirements Segregate hazardous substances/dangerous goods Use load protection and restraint equipments to secure load Protect load according to workplace and legal safety requirements Complete documentation Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements Complete required documentation with reference to DG Code and workplace requirements Capable of identifying load characteristics Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations requirements Capable of securing and protecting load		This unit of competency is applicable to logistics service providers. Practitioners should be capable of loading and unloading cargo according to relevant regulations, standards, codes, and
6. Competency 6. Relevant knowledge of load and unload cargo • Understand load characteristics • Understand the job requirements and workplace procedures • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Load and unload cargo • Identify load characteristics and take into consideration when determine loading and unloading procedures • Identify and handle hazardous substances/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) • Pack/unpack load to make effective and safe use of spaces • Load cargo/goods with reference to relevant workplace procedures and regulatory requirements • Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures • Conduct unloading activities in an efficient and safe manner • Identify goods requiring special documentation and handling and follow appropriate procedures 6.2.2 Secure and protect cargo • Ensure load distribution comply with workplace and legislative requirements • Segregate hazardous substances/dangerous goods • Use load protection and restraint equipments to secure load • Protect load according to workplace and legal safety requirements 6.2.3 Complete documentation • Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements • Complete required documentation with reference to DG Code and workplace requirements 7. Assessment Criteria 7. Assessment Criteria 7. Capable of identifying load characteristics • Capable of loading and unloading goods/cargo in safe and efficient manner • Capable of securing and protecting load	4. Level	2
6.1 Relevant knowledge of load and unload cargo • Understand load characteristics • Understand the job requirements and workplace procedures • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Load and unload cargo • Identify load characteristics and take into consideration when determine loading and unloading procedures • Identify and handle hazardous substances/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) • Pack/unpack load to make effective and safe use of spaces • Load cargo/goods with reference to relevant workplace procedures and regulatory requirements • Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures • Conduct unloading activities in an efficient and safe manner • Identify goods requiring special documentation and handling and follow appropriate procedures • Conduct unloading activities in an efficient and safe manner • Identify goods requiring special documentation and handling and follow appropriate procedures • Ensure load distribution comply with workplace and legislative requirements • Segregate hazardous substances/dangerous goods • Is load protection and restraint equipments to secure load • Protect load according to workplace and legal safety requirements 6.2.3 Complete documentation • Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements 7. Assessment Criteria The integrated outcome requirements of this unit of competency are: • Capable of identifying load characteristics • Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements 6. Capable of loading and unloading goods/cargo in safe and efficient manner • Capable of securing and protecting load	5. Credit	3 (for reference only)
6.2.1 Load and unload cargo Identify load characteristics and take into consideration when determine loading and unloading procedures Identify and handle hazardous substances/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) Pack/unpack load to make effective and safe use of spaces Load cargo/goods with reference to relevant workplace procedures and regulatory requirements Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures Conduct unloading activities in an efficient and safe manner Identify goods requiring special documentation and handling and follow appropriate procedures 2.2 Secure and protect cargo Ensure load distribution comply with workplace and legislative requirements Segregate hazardous substances/dangerous goods Use load protection and restraint equipments to secure load Protect load according to workplace and legal safety requirements 3.2 Complete documentation Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements Complete required documentation with reference to DG Code and workplace requirements The integrated outcome requirements of this unit of competency are: Capable of identifying load characteristics Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) Capable of securing and protecting load	6. Competency	 6.1 Relevant knowledge of load and unload cargo Understand load characteristics Understand the job requirements and workplace procedures Know about the relevant permit/licence requirements, regulations, safety standards and
Pack/unpack load to make effective and safe use of spaces Load cargo/goods with reference to relevant workplace procedures and regulatory requirements Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures Conduct unloading activities in an efficient and safe manner Identify goods requiring special documentation and handling and follow appropriate procedures 6.2.2 Secure and protect cargo Ensure load distribution comply with workplace and legislative requirements Segregate hazardous substances/dangerous goods Use load protection and restraint equipments to secure load Protect load according to workplace and legal safety requirements 6.2.3 Complete documentation Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements Complete required documentation with reference to DG Code and workplace requirements Criteria The integrated outcome requirements of this unit of competency are: Capable of identifying load characteristics Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) Capable of securing and protecting load		 6.2.1 Load and unload cargo Identify load characteristics and take into consideration when determine loading and unloading procedures Identify and handle hazardous substances/dangerous goods with relevant
6.2.2 Secure and protect cargo • Ensure load distribution comply with workplace and legislative requirements • Segregate hazardous substances/dangerous goods • Use load protection and restraint equipments to secure load • Protect load according to workplace and legal safety requirements 6.2.3 Complete documentation • Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements • Complete required documentation with reference to DG Code and workplace requirements 7. Assessment Criteria The integrated outcome requirements of this unit of competency are: • Capable of identifying load characteristics • Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) • Capable of loading and unloading goods/cargo in safe and efficient manner • Capable of securing and protecting load		 subsidiary regulations) Pack/unpack load to make effective and safe use of spaces Load cargo/goods with reference to relevant workplace procedures and regulatory requirements Apply lifting equipments to assist loading procedures according to relevant safety legislation and workplace procedures Conduct unloading activities in an efficient and safe manner
 7. Assessment Criteria		 6.2.2 Secure and protect cargo Ensure load distribution comply with workplace and legislative requirements Segregate hazardous substances/dangerous goods Use load protection and restraint equipments to secure load Protect load according to workplace and legal safety requirements 6.2.3 Complete documentation Inspect cargo for travel security with reference to relevant DG Code and permit/regulations requirements Complete required documentation with reference to DG Code and workplace
8. Remarks	Criteria	The integrated outcome requirements of this unit of competency are: • Capable of identifying load characteristics • Capable of identifying hazardous/dangerous goods with relevant permit/regulations requirements (e.g., Dangerous Goods Ordinance Cap. 295 and subsidiary regulations) • Capable of loading and unloading goods/cargo in safe and efficient manner
	8. Remarks
