Specification of Competency Standards for the Logistics Industry <u>Unit of Competency</u>

2. Code 3. Range 3. Range 4. LOWHCT203A This unit of competency is applicable to logistics service providers. Practitioners should hold relevant licence(s) and be capable of operating a forklift to handle loads according to relevant regulations requirements. (e.g. obtain valid forklift licence) 4. Level 2 5. Credit 6. Competency 6. Competency 6. I Knowledge of forklift operations 9. Understand the forklift operations 9. Understand the forklift operations 9. Understand the job requirements and work area 9. Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Check forklift condition 9. Check forklift condition 10. Check forklift condition 11. Service and OSH requirements, and nature of task 12. Inspect attachments to make sure appropriately operate and adjust 13. Adjust seats and mirrors for safe operations 14. Adjust seats and mirrors for safe operations 15. Check log books and complete workplace documentation 16. 2. Drive the forklift 15. Start, steer, manoeuvre, position, and stop forklift with reference to manufacturers instructions and regulations 16. Ensure the performance and efficiency of engine power to minimise gear and engine damage 16. Item provents and explaints and avoid/control operational hazards through appropriate hazard control techniques and defensive driving 15. Drive forklift in reverse to accurate positions and maintain visibility 16. Operate and secure forklift in accordance with manufacturers' instructions, regulations and workplace procedures 16. Appropriately plan lifting operations and identify appropriate lifting trucks and attachments 16. Assessment control of the programment of vehicle operations 17. Assessment control of the programment of vehicle operations 18. Report malfunctions and irregularity of performance to relevant personnel 18. Manage forklift records in accordance with legislative requirements and workplace procedures 18. Monitor site conditions and irregularity of performance to relevant personnel 18. Manage f	1. Title	Operate forklifts
3. Range		^
4. Level 2 5. Credit 3 (for reference only) 6. Competency 6. Competency 6. Line Stand the forklift operations • Understand the forklift operations • Understand the job requirements and work area • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Check forklift condition • Check forklift condition • Check forklift condition for compliance with manufacturers specifications, relevant workplace and OSH requirements, and nature of task • Inspect attachments to make sure appropriately operate and adjust • Adjust seats and mirrors for safe operations • Check log books and complete workplace documentation 6.2.2 Drive the forklift • Start, steer, manoeuvre, position, and stop forklift with reference to manufacturers' instructions and regulations • Ensure the performance and efficiency of engine power to minimise gear and engine damage • Identify, anticipate and avoid/control operational hazards through appropriate hazard control techniques and defensive driving • Drive forklift in reverse to accurate positions and maintain visibility • Operate and secure forklift in accordance with manufacturers' instructions, regulations and workplace procedures 6.2.3 Operate a forklift to handle cargo • Appropriately plan lifting operations and identify appropriate lifting trucks and attachments • Handle and lift cargoes in accordance with relevant manufacturers specifications, OSH legislation, and workplace procedures 6.2.4 Monitor site conditions • Identify potential hazards and traffic flows and make appropriate adjustments • Assess and monitor site conditions • Identify potential hazards and traffic flows and make appropriate adjustments • Assess and monitor site conditions • Report malfunctions and irregularity of performance to relevant personnel • Manage forklift records in accordance with legislative requirements and workplace procedures 7. Assessment Criteria The integrated outcome requirements of this unit of competency are: • Capabl		This unit of competency is applicable to logistics service providers. Practitioners should hold relevant licence(s) and be capable of operating a forklift to handle loads according to relevant
3. (for reference only) Performance Requirements: 6. Knowledge of forklift operations Understand the forklift operations Understand the job requirements and work area Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6. 2.1 Check forklift condition Check log books and complete workplace documentation 6. 2.2 Drive the forklift Start, steer, manoeuvre, position, and stop forklift with reference to manufacturers' instructions and regulations Ensure the performance and efficiency of engine power to minimise gear and engine damage Identify, anticipate and avoid/control operational hazards through appropriate hazard control techniques and defensive driving Drive forklift in reverse to accurate positions and maintain visibility Operate and secure forklift in accordance with manufacturers' instructions, regulations and workplace procedures 6.2.3 Operate a forklift to handle cargo Appropriately plan lifting operations and identify appropriate lifting trucks and attachments Handle and lift cargoes in accordance with relevant manufacturers specifications, OSH legislation, and workplace procedures 6.2.5 Monitor and maintain forklift performance Assess and monitor site conditions to facilitate safe operations Assess and monitor site conditions to facilitate safe operations Report malfunctions and irregularity of performance to relevant personnel Manage forklift records in accordance with legislative requirements and workplace procedures Capable of checking forklift in safe manner Capable of handle of planning lifting tasks and operating forklift to handle loads efficiently Capable of planning lifting tasks and operating forklift to handle loads efficiently	4 Lovel	
6. Competency 6. 1 Knowledge of forklift operations • Understand the forklift operations • Understand the job requirements and work area • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Check forklift condition • Check forklift condition • Check forklift condition for compliance with manufacturers specifications, relevant workplace and OSH requirements, and nature of task • Inspect attachments to make sure appropriately operate and adjust • Adjust seats and mirrors for safe operations • Check log books and complete workplace documentation 6.2.2 Drive the forklift • Start, steer, manoeuvre, position, and stop forklift with reference to manufacturers' instructions and regulations • Ensure the performance and efficiency of engine power to minimise gear and engine damage • Identify, anticipate and avoid/control operational hazards through appropriate hazard control techniques and defensive driving • Drive forklift in reverse to accurate positions and maintain visibility • Operate and secure forklift in accordance with manufacturers' instructions, regulations and workplace procedures 6.2.3 Operate a forklift to handle cargo • Appropriately plan lifting operations and identify appropriate lifting trucks and attachments • Handle and lift cargoes in accordance with relevant manufacturers specifications, OSH legislation, and workplace procedures 6.2.4 Monitor site conditions • Identify potential hazards and traffic flows and make appropriate adjustments • Assess and monitor site conditions to facilitate safe operations 6.2.5 Monitor and maintain forklift performance • Monitor efficiency and performance of vehicle operations • Report malfunctions and irregularity of performance to relevant personnel • Manage forklift records in accordance with legislative requirements and workplace procedures 7. Assessment Criteria • Capable of planning lifting tasks and operating forklift to handle loads efficiently • Capable of monitoring and maintaining forklift performa		
6.1 Knowledge of forklift operations • Understand the forklift operations • Understand the job requirements and work area • Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Check forklift condition • Check forklift condition for compliance with manufacturers specifications, relevant workplace and OSH requirements, and nature of task • Inspect attachments to make sure appropriately operate and adjust • Adjust seats and mirrors for safe operations • Check log books and complete workplace documentation 6.2.2 Drive the forklift • Start, steer, manoeuvre, position, and stop forklift with reference to manufacturers' instructions and regulations • Ensure the performance and efficiency of engine power to minimise gear and engine damage • Identify, anticipate and avoid/control operational hazards through appropriate hazard control techniques and defensive driving • Drive forklift in reverse to accurate positions and maintain visibility • Operate and secure forklift in accordance with manufacturers' instructions, regulations and workplace procedures 6.2.3 Operate a forklift to handle cargo • Appropriately plan lifting operations and identify appropriate lifting trucks and attachments • Handle and lift cargoes in accordance with relevant manufacturers specifications, OSH legislation, and workplace procedures 6.2.4 Monitor site conditions • Identify potential hazards and traffic flows and make appropriate adjustments • Assess and monitor site conditions to facilitate safe operations 6.2.5 Monitor and maintain forklift performance • Monitor efficiency and performance of vehicle operations • Report malfunctions and irregularity of performance to relevant personnel • Manage forklift records in accordance with legislative requirements and workplace procedures 7. Assessment Criteria The integrated outcome requirements of this unit of competency are: • Capable of planning lifting tasks and operating forklift to handle loads efficiently • Capable of monitoring and m		
 Report malfunctions and irregularity of performance to relevant personnel Manage forklift records in accordance with legislative requirements and workplace procedures Assessment Criteria Capable of checking forklift condition Capable of driving forklift in safe manner Capable of planning lifting tasks and operating forklift to handle loads efficiently Capable of monitoring and maintaining forklift performance 		Performance Requirements: 6.1 Knowledge of forklift operations Understand the forklift operations Understand the job requirements and work area Know about the relevant permit/licence requirements, regulations, safety standards and codes of practice 6.2.1 Check forklift condition Check forklift condition for compliance with manufacturers specifications, relevant workplace and OSH requirements, and nature of task Inspect attachments to make sure appropriately operate and adjust Adjust seats and mirrors for safe operations Check log books and complete workplace documentation 6.2.2 Drive the forklift Start, steer, manoeuvre, position, and stop forklift with reference to manufacturers' instructions and regulations Ensure the performance and efficiency of engine power to minimise gear and engine damage Identify, anticipate and avoid/control operational hazards through appropriate hazard control techniques and defensive driving Drive forklift in reverse to accurate positions and maintain visibility Operate and secure forklift in accordance with manufacturers' instructions, regulations and workplace procedures 6.2.3 Operate a forklift to handle cargo Appropriately plan lifting operations and identify appropriate lifting trucks and attachments Handle and lift cargoes in accordance with relevant manufacturers specifications, OSH legislation, and workplace procedures 6.2.4 Monitor site conditions Identify potential hazards and traffic flows and make appropriate adjustments Assess and monitor site conditions to facilitate safe operations
 7. Assessment Criteria		 Report malfunctions and irregularity of performance to relevant personnel Manage forklift records in accordance with legislative requirements and workplace
 Criteria Capable of checking forklift condition Capable of driving forklift in safe manner Capable of planning lifting tasks and operating forklift to handle loads efficiently Capable of monitoring and maintaining forklift performance 	7 Assassment	
 Capable of driving forklift in safe manner Capable of planning lifting tasks and operating forklift to handle loads efficiently Capable of monitoring and maintaining forklift performance 		
 Capable of planning lifting tasks and operating forklift to handle loads efficiently Capable of monitoring and maintaining forklift performance 	Cincila	
Capable of monitoring and maintaining forklift performance		,
O. ACHIGIAS	Q Domontes	Capable of monitoring and manitaning forking performance
	o. Remarks	

1. Title	Prepare for transport of dangerous goods
